## HONEY CONNOISSEUR COLOR GUIDE

here are seven designated colors of honey in varying intensities from water white to dark amber. This standard system for measuring the color of liquid honey is called the Pfund color grading system. Color is measured visually using a glass tile and is expressed as the relative lightness or darkness of amber on a scale in millimeters. Below are the seven colors of honey using the Pfund system and a few types of varietal honeys that correspond to those colors.

CREAM - PEARL - BLUSH - BEIGE - LIGHT CHARTREUSE - STRAW - BANANA O MM **8** MM BUTTER - MAIZE - CITRUS - GREEN **8** MM 17 MM YELLOW - MARIGOLD - BUTTERSCOTCH - SUNFLOWER - DAFFODIL - BRASS 17 MM 34 MM APRICOT - CORAL - SALMON - PEACH - DUSTY - PUMPKIN - ORANGE FXTRA LIGHT AMRFR 34 MM **50** MM MANGO - CLEMENTINE - FLAME - BURNT ORANGE - AUBURN - BRICK 85 NM **50** MM LIGHT AMBER <u>Blood - Maroon - Claret - Plum - Mahogany - Rawhide - Carob - Henna</u> **AMBER 85** MM 114 MM CLOVE - COCOA - EARTH - MINERAL - HAZELNUT 114 MM 140 MM

Honey is extremely rich in color beyond the seven shades of ambers represented by the Pfund color chart. Our color chart also includes a spectrum of other colors you may observe in your honey samples.
